Risk management tool

DUTY OF CARE, OCCUPATIONAL HEALTH & SAFETY, AND SECURITY

© UNHCR/Hélène Caux
BACKGROUND AND PURPOSE

The Enterprise Risk Management (ERM) Service has developed this tool, in close consultation with other relevant headquarters divisions and entities, to assist field operations in ensuring that possible risks related to duty of care, occupational health and safety (OHS), and security have been adequately identified and analysed, and that relevant treatments – proactive and reactive – have been thoroughly considered and agreed upon within the operation. At the same time, it is also important to keep in mind that managing risks may also have a positive effect on operations’ objectives and help identify opportunities as we scan the horizon and analyse what is coming. The tool is purely an advisory resource: the authority to issue mandatory instructions and guidance rests with different divisions and entities whom ERM Service has consulted in the development of this tool:

- Advisory Committee on Occupational Health and Safety (ACOSH), Division of Human Resources (DHR), including the Staff Health & Wellbeing Service
- The Ethics Office
- Field Security Service (FSS), Division of Emergency, Security and Supply
- Office of the Senior Coordinator on Prevention of and Response to Sexual Exploitation and Abuse and Sexual Harassment, including the Victim Care Officer (Sexual Misconduct)

The tool comprises of key risks linked to duty of care, OHS and security, with examples of causes, consequences and treatments that may apply in your operation. These risks and treatments are the result of an analysis of the operational risk register, relevant sectoral policies and guidelines and colleagues’ contributions. The Ethics and Ombudsman’s Offices, the Senior Coordinator on Prevention and Response to Sexual Exploitation and Abuse and Sexual Harassment and Division of Human Resources provide resources to treat some of the causes or consequences of these risks.

While we have attempted to be as comprehensive as possible, there may still be elements of risks and treatments that have not been captured. Operations are welcome to contribute by sending additional proposals and comments to hqerm@unhcr.org, with subject: Tool – Duty of Care, Occupational Health & Safety, and Security. The tool is applicable to UNHCR personnel (colleagues holding UNHCR-issued contracts and all Affiliate Work Force).

REMARKS

The United Nations High Level Committee on Management (HLCM) defines duty of care as “a non-waivable duty on the part of the organizations to mitigate or otherwise address foreseeable risks that may harm or injure its personnel and their eligible family members”. Duty of care consists both of security management, to protect personnel from intentional, malicious acts, and also occupational health and safety. Occupational health and safety can be thought of as the discipline dealing with the prevention of work-related injuries and diseases as well as the protection and promotion of the health and safety of workers (including mental health). The UNHCR policy on security management defines roles and responsibilities for ensuring the security of UNHCR personnel, premises, assets and operations within the overall context of the United Nations Security Management System (UNSMS).

The UNHCR policy on occupational health and safety provides a framework for the establishment of a management system to be implemented in all premises. The OHS Policy is guided by applicable ILO conventions, WHO recommendations, and international standards on occupational health and safety, without prejudice to higher health and safety standards that might exist in any host country. In the UNHCR Code of Conduct, principle 5 is to promote the safety, health and welfare of all UNHCR staff as a necessary condition for effective and consistent performance. The role of a manager/supervisor to take steps to ensure that the health and well-being of personnel and their families are not subjected to undue risk is made explicit as is the commitment to promote a healthy work-life balance for personnel.

Other key elements of duty of care in UNHCR include disability inclusion and ensuring a victim centred approach. The UNHCR policy on a Victim Centred Approach sets out the key principles that UNHCR applies in sexual misconduct cases. When considering duty of care and OHS risks more broadly, specific attention should also be given to colleagues with disabilities. Even under normal circumstances, persons with disabilities face major health and safety and accessibility risks. This is further exacerbated for those living and working in humanitarian and fragile contexts. The COVID-19 pandemic has been intensifying these inequalities. It is therefore essential for UNHCR as part of the United Nations system to mainstream disability inclusion and to build and foster inclusive working environments and integrate disability inclusion as part of OHS. Doing so allows for equitable outcomes for all colleagues, particularly in terms of physical accessibility of all premises.
HOW TO USE THE TOOL?

Your operation can select one or more risk event(s) that apply to your context, as well as the applicable causes, consequences and related treatments. Make the selections from the independent columns (not rows). Based on the selected relevant causes and consequences, select multiple corresponding proactive and reactive treatments. Some treatments may mitigate more than one cause / consequence. Please note that none of the proactive or reactive treatment "menu" are compartmentalised and that treatments can be applicable to one or several causes or consequences. All risk statements* (causes, event and consequences) and treatments may not be applicable / relevant or possible in an operation and should be edited and adjusted to your specific operational context.

Key risks should be reflected in the operation’s overall online risk register. If multiple risks from this tool are relevant to your operation, we would suggest capturing them in one or two higher level risks to keep the overall risk register as a streamlined, prioritized management tool for the Representative and senior management team.

* A risk statement consists of four parts, namely, an event, causes, consequences and a name. A risk may have multiple causes and consequences but has only one risk event. The risk name should be succinct and clearly identify the risk. Risk treatments are actions to reduce the likelihood and impact of the risk. Proactive risk treatment actions are implemented before a risk event occurs, based on identified causes of the risk event. Reactive risk treatments are executed after a risk event occurs, thus addressing the consequences of the risk event occurring.

High Level Committee on Management (Duty of Care and Addressing Sexual Harassment within the Organizations of the UN)
## Risk event | Threats to physical security occur (1/2)

### Causes
- Armed conflict, civil unrest, terrorism or other kinds of crime in host country
- Insufficient law and order in country with widespread criminal gangs, protection rackets, extortion, protests, or social unrest, etc.
- Failure to implement existing security risk management measures and follow Standard Operating Procedures (SOPs)
- Host community or persons of concern (PoCs) protest against UN, UNHCR, or partners
- Rumours, miscommunication, false media reporting or xenophobia triggering animosity between PoCs and host communities or the UN
- Neutrality, impartiality or independence of UN is perceived as compromised or UN or partner personnel are perceived as guilty of misconduct
- PoCs who disagree with decisions or actions by UNHCR, including individual decisions on assistance, protection and solutions as well as broader targeting criteria, may become deeply aggrieved, emotional or self-destructive and verbally or physically aggressive towards UNHCR personnel
- Culturally or politically sensitive programmes (e.g. GBV / LGBTI campaigns) increase tensions and therefore security risks
- Presence or transportation of physical cash at UNHCR or partner premises or distribution sites increases security risks

### Proactive treatments
- Take active part in UNSMS processes, including through the Security Management Team (SMT) or Areas SMT, to ensure measures are sound, comprehensive, and meet UNHCR’s needs
- Ensure updated Security Risk Management process is undertaken and Security Risk Management Measures (SRMM), including SOPs and security plans, are available and known by all personnel (Security Policies & Guidelines)
- Strengthen security protocols, coordinate and share relevant security information regularly between UNHCR, partners, host government, UNDSS, Designated Official (DO), national security authorities and other stakeholders
- Complete mandatory security training (all personnel) and ensure managers are properly trained and complete Security Management Learning Programme and SMT training
- Perform drills and rehearsals to ensure understanding of SOPs and actions to take in case of various security incidents
- Monitor and analyze security incidents – table these and fully engage in decision making at SMTs
- Encourage and enable information flow on security matters among all staff members
- Participate in Interagency Programme Critically process for high-risk locations (where determined)
- Ensure Business Continuity Plan (BCP) is up-to-date and understood - consider alternate modalities to work where UNHCR may be directly targeted
- Conduct security assessment of facilities and ensure office and residences are compliant with all relevant security risk management measures (e.g. panic buttons, access controls, emergency exits etc.)
- Enhance communication and inform PoCs of changes in assistance, engage in communication strategies with communities (Manual on Security of Persons of Concern)

### Consequences
- Critical incident occurs resulting in fatality, injury, abduction or detention of personnel
- UNHCR and partners have challenges filling positions leading to increased stress, overburdened staff, reduction in staff morale
- Failure of UNHCR to implement or monitor programmes due to lack of secure access to implementation sites – leading to increased operational, financial and reputational risks
- Loss or damage to UNHCR and partner personnel's personal property
- Disruption in service delivery to PoCs
- Increased insecurity for PoCs, exacerbating protection challenges
- UNHCR can suffer reputational risk, if the organization fails to fulfill duty of care towards personnel and this may impact morale negatively
- UNHCR undertakes different measures than other UN organizations, such as relocating or evacuating personnel, and may face challenges to re-engage or re-establish presence, thus losing operational space

### Reactive treatments
- Activate respective security SOPs or contingency plan and report security incident (report) immediately after occurrence
- Activate BCP / Evacuation Plan with alternative work modalities / relocation and evacuation (in consultation with DO/SMT and Regional Bureau as per policies of the UNSMS and UNHCR)
- Have appropriate mass casualty and medical evacuation plans, implement treatment or medical evacuation for injured personnel (FAQ)
- Provide support to affected personnel (medical, psychosocial) as well as others if required, as per the UNHCR SOP on supporting staff following critical incidents
- Regularly test communications tree, equipment and systems used to ensure headcount and alert systems work and can be activated when needed
- Where appropriate, conduct a Personal Security Risk Assessment to determine specific threats to individual so that other options such as relocation and evacuation may be further reviewed
- Engage a third party to monitor programme implementation e.g., civil society, faith-based organization etc.
- Alert and seek support of local authorities, security services, should personnel or office assets and operations come under imminent threat

<tr>
<td>Personnel are not sufficiently trained and briefed on the security situation and instructions at the duty station and/or do not adhere to security advice and SOPs</td>
<td>Ensure reliable communication options are available to personnel to communicate internally, to UNDSS / Security Operations Centre in line with SRMM and that personnel have access to the required communications equipment (cell phones, internet connectivity, radios, Sat phones, HF/VHF radio as applicable) and personal protective equipment</td>
<td>Monitor media reports and respond as needed and establish clear and regular communication lines with PoCs to explain operational decisions. Ensure regular counselling with all necessary safety measures in place (e.g. panic button, video surveillance, access protocols etc.)</td>
<td>Develop and use approved “if-asked” lines for responding to questions by donors, media and other stakeholders</td>
</tr>
<tr>
<td>Lack of appropriate security and/or communications equipment available</td>
<td>Monitor media reports and respond as needed and establish clear and regular communication lines with PoCs to explain operational decisions. Ensure regular counselling with all necessary safety measures in place (e.g. panic button, video surveillance, access protocols etc.)</td>
<td>Consider alternative modalities to physical cash payments to reduce risks associated with the presence and transportation of cash, and if not possible, secure the area before and during cash distribution</td>
<td>Revise objectives, budget and implementation modalities to match changed circumstances</td>
</tr>
<tr>
<td>Office accommodation and onsite working conditions do not comply with UN Security Management System (UNSMS) policy and guidelines “Security of United Nations Premises”</td>
<td>Consider alternative modalities to physical cash payments to reduce risks associated with the presence and transportation of cash, and if not possible, secure the area before and during cash distribution</td>
<td>Explain the importance of UNHCR’s neutrality, independence and impartiality to all personnel as well as partners, local authorities, militaries, PoCs and corporate partners, as needed</td>
<td>Contact and cooperate with regional or country Security Officer, FSS, UNSMS organizations, UNDSS and relevant host government authorities to take appropriate action</td>
</tr>
<tr>
<td>Personnel residencies do not comply with Residential Security Measures (RSM)</td>
<td>Explain the importance of UNHCR’s neutrality, independence and impartiality to all personnel as well as partners, local authorities, militaries, PoCs and corporate partners, as needed</td>
<td>Ensure personnel conduct is in line with Code of Conduct</td>
<td>Provide administrative support to complete inventory of personal assets in order to effect malicious act insurance later if needed</td>
</tr>
<tr>
<td>UNSMS is not functioning and does not have adequate resources</td>
<td>Ensure personnel conduct is in line with Code of Conduct</td>
<td>Consider security risks and mitigations as part of strategic planning including their impacts on programmes (and conversely, how our activities may impact the risk), and ensure adequate resources are allocated for needed measures</td>
<td>Encourage personnel to obtain private insurance for personal effects. Provide a list of local insurance companies (or international companies if not locally available)</td>
</tr>
<tr>
<td>The capacity of the host country to afford security and protection to UN is limited</td>
<td>Consider how threats and risks might impact different members of the team due to their individual profiles (gender, nationality and ethnicity, contractual category, sexual orientation and other aspects); ensure measures that are responsive to this</td>
<td>Foster a strong culture of security: reward security-conscious behavior, address non-compliance, and ensure manager and leaders in particular set a good personal example</td>
<td>Record and analyse incidents, and breaches of security rules to learn lessons to prevent reoccurrence of breaches or improve responses to critical incidents</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Report security incidents to all necessary managers and services at HQ who can provide the necessary support in line with SOPs and Administrative Instructions</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Monitor feedback mechanisms and complaints for any trends and/or threats of major PoC dissatisfaction that could trigger anger or protests etc.</td>
</tr>

### Risk event | A road crash involving UNHCR personnel and/or vehicles occurs

<table>
<thead>
<tr>
<th>Causes</th>
<th>Proactive treatments</th>
<th>Consequences</th>
<th>Reactive treatments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor road conditions, inadequate vehicle characteristics, and risky driving behaviours</td>
<td>Promote safe driving and implement precautionary measures to avoid or reduce security risks during travel</td>
<td>Serious injury, or trauma or death caused by road crashes for UNHCR personnel, UNHCR vehicle passengers, partner organization staff and third parties</td>
<td>Promptly report any road crashes</td>
</tr>
<tr>
<td>Speeding, distracted driving or inappropriate care is taken to adjust speed for the road, weather and/or road users</td>
<td>Conduct journey planning which includes analysis of road characteristics, ensuring sufficient travel time to reach destinations at a safe speed and to avoid driver over-tiredness</td>
<td>Potential longer-term disabilities due to excessive exposure to poor road conditions</td>
<td>Secure the scene of the road traffic crash, and provide first aids when possible and necessary</td>
</tr>
<tr>
<td>Use of substances, such as alcohol, medication, intoxicants which can impair driving</td>
<td>Ensure vehicle tracking systems (VTS) are installed and monitored and that speeding or other breaches are actioned by management</td>
<td>Reduced ability to conduct field-missions and deliver protection and assistance to PoCs</td>
<td>Call emergency/breakdown services where possible</td>
</tr>
<tr>
<td>Poor vehicle maintenance</td>
<td>Sensitize drivers on safe driving, defensive driving and local traffic laws (strict implementation of safe-driving bonus) - regular driving training and all personnel undertake road safety awareness training</td>
<td>Reduced community trust and reputational damage for UNHCR where UNHCR vehicles cause accidents involving PoCs or host communities</td>
<td>Provide medical evacuation of affected personnel if required</td>
</tr>
<tr>
<td>Personnel pressure drivers to reach destinations faster</td>
<td>Conduct periodic medical assessments of drivers to ensure they have valid medical clearance to work</td>
<td>Potential financial losses and increased costs</td>
<td>Implement trauma care centres in remote areas if possible</td>
</tr>
<tr>
<td>Drivers lack the skills and training required to drive safely in the relevant environments</td>
<td>Ensure sufficient numbers of drivers familiar with operational environment</td>
<td>Damage on the reputation of the organization</td>
<td>Conduct a root cause analysis of the accident to see if lessons can be learnt to prevent similar future incidents</td>
</tr>
<tr>
<td>Insufficient number of drivers who are not equipped to work in unfamiliar environments</td>
<td>Monitor and where necessary, limit the frequency that individuals travel by road to reduce health impacted by poor roads</td>
<td>Where UNHCR is at fault for a road crash involving affected populations, ensure robust follow up communication with communities</td>
<td>If appropriate, initiate disciplinary action against negligent personnel</td>
</tr>
<tr>
<td>Road missions are undertaken without proper planning and scheduling, increasing the likelihood of over-tired drivers and of key supplies or equipment, such as first aid kits not being in the vehicle, and of speed limits being broken</td>
<td>Ensure vehicles are in a good working condition and regularly maintained</td>
<td>In case of road accidents and loss of life, involve Legal Affairs Service (LAS) for guidance in case of indemnities or compensation, but also if a driver and/or other UNHCR personnel are arrested or vehicle is seized</td>
<td></td>
</tr>
<tr>
<td>Safety instructions and rules are not followed by all passengers (e.g. safety belts not used by all)</td>
<td>Place first aid kits in vehicles and conduct regular replenishments and checks to ensure the kits remain complete</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Lack of oversight or guidance over partner organization drivers</td>
<td>Provide first aid training for drivers and personnel</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Risk management tool: Duty of Care, Occupational Health & Safety, and Security
Risk event | A disaster or disease outbreak harms personnel and dependents

**Causes**

- Office or UNHCR-provided accommodation is not in line with relevant seismic building standards
- Personnel is not properly trained on disease prevention and recommended behaviour in case of a natural disaster
- Infectious disease prevention measures fail or are not prioritised by host government (disease outbreak)
- Duty station is frequently subject to disasters, such as earthquakes, floods, volcanic eruptions and hurricanes/cyclones
- An infectious disease outbreak occurs (epidemic or pandemic)
- In the workplace biological hazards, agents, allergens, or pathogens (such as bacteria or viruses), may be inhaled or transmitted via contact or ingested (e.g. via contaminated food products)
- Underlying health conditions exist and increase health risks if infected with COVID-19 or other diseases
- Those infected with communicable diseases are not isolated and treated effectively; basic medicine is not available
- Limited health services in country and personnel regularly operating in locations lacking primary health care mean that UNHCR is unable to respond to medical emergencies in a timely and appropriate manner
- Relevant required personal protective equipment for health is unavailable to personnel
- Country does not have sufficient mental health capacities to respond to the psychological consequences of a disaster or disease outbreak
- Stigma of mental health problems is widespread in the country and/or information about available mental health resources is not easily accessible

**Proactive treatments**

- Establish and keep up-to-date medical evacuation plans and associated SOPs
- Complete a duty station level health risk assessment
- Ensure Business Continuity Plans are in place and regularly updated
- Pre-position appropriate personal protective equipment to UNHCR & partner personnel: face masks, air purifiers, sanitizer, water, hygiene items, etc.
- Ensure access to UN clinics and medical facilities for UNHCR personnel and dependents if applicable
- Identify providers of staple food and medicine abroad and stockpile emergency rations of essential supplies where required by the UN-wide Security Risk Management Measures
- In coordination with the UNCT, assess the presence or otherwise of the Mandatory Health Support Elements in country, namely, Primary Care, Hospital Care, Mental Health Services, Mass Casualty Plan, Medical Emergency response and Access to Pharmaceuticals; for more details consult pages 14 and 15 of CEB/2018/HLCM/5/Rev.1
- Prepare Peer Adviser Network members for their role in either a disease outbreak or disaster
- Train where appropriate personnel on disease prevention and required behaviour in natural disasters

**Consequences**

- UNHCR personnel and their dependents may suffer injury, loss of life or illness
- Our ability to operate in the location may be impaired, undermining protection and assistance for persons of concern
- UNHCR may suffer reputational damage and be seen to not look after personnel – making attracting and retaining talent harder
- Mistrust of the workforce in UNHCR’s duty of care commitment, negatively impacting on their physical and psychosocial wellbeing
- Reduction of personnel’s health and wellbeing, subsequently negatively impacting performance, morale and absences

**Reactive treatments**

- Evacuate personnel as required as per policy and relevant SOPs
- Activate Business Continuity Plans and required responses, including potential ordering and distribution of personal protective equipment
- Share updated information regularly on how to deal with the disease outbreak or disaster, and ensure appropriate information resources available to personnel
- Review programme criticality criteria and implement Business Continuity Plan if required, regularly monitor environment and implement changes as needed
- Ensure intervention protocols for psychosocial response to such events are ready and everybody’s role is clear

---

Risk management tool: Duty of Care, Occupational Health & Safety, and Security
### Risk event | Sexual harassment by or of UNHCR personnel occurs (1/2)

#### Causes
- If there is a risk of Sexual Exploitation and Abuse (SEA), or SEA occurs in an operation, there may be a higher risk for Sexual Harassment (SH) in same operation and vice versa
- Lack of gender balance in the office overall or in areas or functions of work and management
- Weak leadership in establishing safe, open, inclusive and respectful working culture
- Strong power differentials (e.g., hierarchical culture) among personnel without checks and balances
- High use of short-term contracts and affiliated workforce arrangements with increased vulnerability to SH because of job insecurity
- Working environment does not allow for safe reporting of SH or does not provide space to speak up
- Low trust in reporting mechanisms and follow-up actions exists or lack of awareness of reporting and redress mechanism
- Managers and personnel are unaware of desired behaviour, policies, guidance and training materials, or who to turn to if they have questions about sexual harassment

#### Proactive treatments
- Create a safe, respectful, open, inclusive atmosphere in the office, talk regularly about sexual harassment in staff meetings and include information about with whom concerns could be raised
- Leadership (Representatives and Heads of Offices) model inclusive, respectful behaviour and take action to create safe, open, inclusive and respectful working environments. For example, managers to hold a session on attitudes, values and organizational culture in relation to prevention on sexual misconduct, using the Facilitator’s Guide
- Publicise the SpeakUp helpline and the services of the Victim Care Officer (Sexual Misconduct) to deter sexual harassment and increase the likelihood of it being reported
- Share information on the policy on a Victim Centred Approach for Victims of Sexual Misconduct and Strategy and Action Plan on Prevention of Sexual Abuse & Harassment (Plan)
- Colleagues, supervisor, or peer advisor to reach out to the Victim Care Officer (Sexual Misconduct) for advice and guidance on prevention of SH and the services provided for victims and on how to handle an incident of sexual harassment in accordance with the policy on a Victim-Centred Approach for Victims of Sexual Misconduct
- Embed contextualised SH information into psychological preparation for high-risk duty stations and into security briefings on arrival at duty station
- Ensure relevant posters and leaflets on available resources are visible and available in workplaces and compounds, in relevant languages

#### Consequences
- Victim’s physical health, psychosocial wellbeing, productivity, motivation and personal life is negatively impacted
- Unwanted pregnancy
- Reduced productivity and effectiveness in operation, impact on morale of colleagues who may know about the sexual harassment
- De-motivated personnel
- Increase in workforce turnover (i.e. victim’s resignations / non-renewal of victim’s employment contracts) and higher vacancy rates if the operation develops a bad reputation and attracts fewer applications
- Unaddressed sexual harassment resulting in multiple victims
- Unaddressed sexual harassment making way for sexual exploitation and abuse of persons of concern
- UNHCR’s reputation and credibility negatively impacted

#### Reactive treatments
- Ensure anyone who has experienced sexual harassment is referred to the Victim Care Officer (Sexual Misconduct) unless they decline. The Victim Care Officer offers confidential psychosocial support, advice, guidance on all the options, including the formal and informal process, and provides accompaniment throughout the process
- Encourage colleagues, supervisor or peer advisor to reach out to the Victim Care Officer (Sexual Misconduct) for confidential advice and guidance on how to handle an incident of sexual harassment in accordance with the policy on a Victim-Centred Approach for Victims of Sexual Harassment (VCA)
- Ensure implementation of the policy on a Victim-Centred Approach for Victims of Sexual Harassment and in particular that support and assistance to victims is provided in accordance with a victim-centred approach as outlined in that policy
- Immediately implement a traumatic incident protocol in cases of sexual assault or rape
- Ensure that victims of sexual harassment are protected against retaliation in accordance with the AI on protection against retaliation and the policy on a Victim-Centred Approach

---

[1] Sexual harassment (SH) is defined in the UN System Model Policy on Sexual Harassment. “Sexual harassment is any unwelcome conduct of a sexual nature that might reasonably be expected or be perceived to cause offense or humiliation, when such conduct interferes with work, is made a condition of employment or creates an intimidating, hostile or offensive work environment. Sexual harassment may occur in the workplace or in connection with work. While typically involving a pattern of conduct, sexual harassment may take the form of a single incident. In assessing the reasonableness of expectations or perceptions, the perspective of the person who is the target of the conduct shall be considered.” For more information visit [SEA/SH](https://www.unhcr.org/).
### Causes

- Victims do not know what support structures are available to them, and in particular do not know about the Victim Care Officer who is available to provide support to them.
- Colleagues are unaware of action which they might take when they witness sexual harassment, or what they might do to mitigate the risk of and prevent sexual harassment from occurring in their workplaces.
- Inappropriate living arrangements in UNHCR compounds, where privacy is compromised.
- Lone female UNHCR workers in remote locations, or minority female UNHCR workers in majority male teams in remote locations.

### Proactive treatments

- Representatives to ensure the roll-out to all staff of the [learning package on prevention and response to sexual harassment](#), complemented by the [learning package on sexual exploitation and abuse](#).
- Representatives to monitor the completion rates of the SH [learning package](#) and ensure colleagues take all relevant mandatory e-learning.
- Ensure SH is included in trainings on misconduct, i.e., Code of Conduct, Dialogue discussions and required refresher and in all relevant trainings (security, risk management, human resources, ethical behaviour/integrity etc.).
- Provide the Women’s Security Awareness Training - which includes a dedicated session on sexual harassment.
- Managers and Peer Advisors to raise awareness of sexual harassment in the operation, look for changes in behaviour in possible victims for intervention and referral.
- Carry out proper vetting and reference checking of all recruitments, including checking against ClearCheck.
- Operational management to circulate the annual broadcast on Decisions on disciplinary matters and cases of criminal behavior within the operation, to demonstrate accountability in action and ensure all colleagues are aware of the consequences of misconduct.
- Provide safe and separate spaces for female and male colleagues to come together and discuss issues of gender dynamics and sexual harassment complemented by safe spaces for them to do so together.
- Review and monitor HR data on team composition, including the impact of workforce decisions on gender and diversity, and address gaps.
- Conduct exit interviews with all personnel who resign or whose contracts are not extended, to identify possible reasons, which may include occurrence of SH.
- Ensure that living arrangements in workforce compounds are safe, appropriate and culturally sensitive.

### Consequences

- Operational management to re-circulate the annual broadcast on Decisions on disciplinary matters and cases of criminal behaviour within the operation, to demonstrate accountability in action and ensure all colleagues are aware of the consequences of misconduct.
- Ensure strong engagement at leadership level (Representatives / Heads of Offices), including initiating all personnel dialogues on how to strengthen safe, open, respectful and inclusive working environments including through holding a session on values, attitudes and organizational culture to prevent sexual misconduct, using the [Facilitator’s Guide](#).
- Refer to the Inspector General’s Office (IGO) when the victim wants to make formal complaint. The Victim Care Officer can also offer support during this process.
- Refer to the Office of the Ombudsman and Mediation Service at ombuds@unhcr.org if the victim wishes to resolve this using the informal process. The Victim Care Officer can offer support during this process.
- Representatives to ensure the roll-out to all staff of the [learning package on prevention and response to sexual harassment](#), complemented by the [learning package on sexual exploitation and abuse](#), if not already done.
Personnel do not have coping mechanisms for prolonged difficult working and living conditions and are unaware of the various available support structures.

Managers and personnel may be unable to detect in themselves and colleagues signs that they are affected by stress, overwork, burnout or trauma and may not know how to handle the situation.

Personnel are repeatedly exposed to traumatic stories during protection counselling, interviews or case processing activities.

Employment insecurity because of uncertain resources and future priorities of UNHCR leads to stress.

Unreliable and/or expensive internet and phone lines make it harder for personnel to stay connected with their support network of family and friends.

Confinement or work from home is implemented for long periods of time leading to isolation, especially at hardship duty stations.

Both national or international personnel are unable to visit family resulting in long separation from family members, due to travel restrictions or security at destination (no UNDSS security clearance is obtained) or cost of family visits.

Cumulative effect of frequent rotation, stressful working environments (both internal and external), frequent and long-term separation from family.

Personnel are continuously assigned to high risk, non-family duty stations.

**Causes**

**Proactive treatments**

Refer to a staff counsellor to provide counselling sessions on self-care, stress management and coping mechanisms and available resources ([Staff Health & Wellbeing Service](https://www.staffhealth.unhcr.org/)).

Establish a "buddy" system to provide support and address fear and uncertainties regarding living conditions; support or establish Peer Advisor Network ([PAN](https://www.staffhealth.unhcr.org/)).

Ensure psychosocial preparation prior to assumption of duties ([changing assignment](https://www.staffhealth.unhcr.org/)) and implement assignment debriefings.

Increased use of flexible working arrangement where appropriate.

Implement or upgrade workforce recreational facilities in remote locations.

Ensure potential future personnel are accurately informed about conditions in the duty station.

Implement programmatic induction by protection team and psychosocial briefing on impact of work to frontline workers.

Provide reinforced counselling and psychosocial support to frontline workers i.e., registration, refugee status determination, resettlement, case workers and partner personnel.

Proactively approach staff counsellor, to provide counselling sessions on self-care, [stress management](https://www.staffhealth.unhcr.org/) and coping mechanisms and available resources on the [Staff Health & Wellbeing Service platform](https://www.staffhealth.unhcr.org/).

**Consequences**

Individual's physical and psychosocial wellbeing may be negatively impacted leading to fatigue, stress, depression, burnout, vicarious trauma, negative coping mechanisms or in extreme cases violence, homicide or suicide.

Increased levels of absenteeism and sick leave, personnel turnover and difficulty in attracting personnel to the duty station.

Reduced morale, motivation and productivity of UNHCR and partner personnel, impacting UNHCR’s overall effectiveness and its ability to implement projects for affected populations.

UNHCR may suffer reputational damage and be seen as to not look after personnel – making attracting and retaining talent harder.

Conflict within the operation between personnel may increase, leading to a negative working environment.

Personnel with disabilities could face graver mental health issues especially in emergency contexts.

Personnel with disabilities might be given negative performance reviews.

**Reactive treatments**

Reach out to [psychosocial wellbeing section](https://www.staffhealth.unhcr.org/) for assistance in implementing reactive strategies such as supervision, group sessions for frontline workers after (vicarious) trauma or critical incidents, or individual counselling.

Refer personnel to staff counsellor to provide resources on self-care, stress management, coping mechanisms, internal/external resources available and appoint Peer Advisor ([PAN](https://www.staffhealth.unhcr.org/)).

Improve communications on staff wellbeing.

Implement recommendations from missions by accommodation unit, staff councillor, Evaluation Service, Audit and IGO to address circumstances in which personnel work or live.

Utilise external local resources for health or psychosocial support.

Contact the Ombudsman’s Office [ombuds@unhcr.org](mailto:ombuds@unhcr.org) for advice and guidance on how to deal with conflict.

Establish a referral mechanism to refer colleagues to staff welfare through the disability resource group for those facing issues.

Seek advice and support from the Ethics Office on matters of workplace ethical behaviour.

Risk event | Failure to secure a sustainable and healthy work-life balance for personnel (1/2)

**Causes**

An emergency situation requires personnel to work excessive and continuous long hours to fulfill the humanitarian imperative

Upscaling of an operation without required increase in resources arriving in a timely manner

Downscaling of an operation or closure of offices without appropriate resources to responsibly implement the downsizing

Vacancies are not filled quickly enough due either to difficulties in recruiting suitable candidates or in bringing selected candidates onboard due to visa/travel challenges or delays from the releasing operation

Staff turnover increases and knowledge management and handovers are not effective resulting in increased knowledge gaps and weakened institutional memory

Public health issues lead to high numbers of personnel being sick or self-isolating or unable to assume their duties, increasing workload for remaining personnel

Multiple, uncoordinated additional or ad hoc requests with short deadlines from outside the operation

Poorly planned and uncoordinated leave and R&R absences lead to temporary gaps in core functions and management

R&R or annual leave is not respected or postponed

Time differences, holiday periods and different UN observed holidays and working days of country offices and regions are not adequately respected

**Proactive treatments**

Ensure effective vacancy management to have all key staff positions filled as quickly as possible and personnel informed about their future employment

Submit timely request for staff on mission, Temporary Assignment (TA), Affiliated Work Force (AWF) and other interim arrangements to ensure there is no / limited staffing gap

Improve communication on staff wellbeing, implement recommendations of relevant reviews, reports and missions etc.

Ensure periodical and proactive dialogue with Peer Advisor Network, Code of Conduct Dialogue facilitators and Staff Association to identify and resolve concerns and issues

Provide timely feedback for effective performance management to all personnel, including AWF, on performance to allow time for improvement if required

Support supervisors and hold them accountable for establishing individual and team workplans, for periodical review, assesses personnel workload, find solutions and give guidance on priority setting through inclusive dialogue

Promote dialogue between personnel, break down silos, build team and have at least one annual retreat to improve working environment

Provide training on resilience building, self-care (Psychosocial Wellbeing Section), communication, building trust, conflict management, teambuilding activities, fostering an ethical culture, etc. (Ethics Office) and conflict resolution (Ombudsman’s Office)

**Consequences**

Increased risk of burnout, leading to reduced morale, motivation and productivity of personnel impacting overall UNHCR effectiveness

UNHCR objectives and priorities may not be achieved, leading to reputational risk in the eyes of PoCs, donors, host governments, host communities, or other external stakeholders

Reduced performance and controls because of insufficient personnel to ensure segregation of duties, leading to increased risk of non-compliance, human errors, fraud or delays, increasing stress for remaining personnel

Increased risk of core functions being de facto delegated to AWF (deployees, UNVs), increasing contractual disparity, potentially leading to tensions and conflicts

Personnel do not have time for learning and development activities, negatively impacting career advancement and their effectiveness

Effective handovers and saving of documentation is not done and information is lost, increasing knowledge gaps and weakening institutional memory

Conflict between personnel will increase and create a negative working environment

Reflects poorly on the people management of UNHCR which may demoralize the workforce

**Reactive treatments**

Refer personnel to staff counsellor / Psychosocial Wellbeing Section to provide resources on self-care, stress management, coping mechanisms and/or external resources available

Ensure utilisation of annual leave allocation as well as mandatory time off after emergency missions and hardship assignments

Enhance organizational structure and overall HR strategy, to ensure that staffing is fit for purpose and workload distribution is appropriate for level of post

Revise organizational structure and overall HR strategy, to ensure that staffing is fit for purpose and workload distribution is appropriate for level of post

Managers to prioritise HR recruitment / reassignment processes, consider AWF arrangements, emergency response team deployments, staff in between assignments (SIBAs) etc.

Refer personnel to the Ombudsman’s Office for conflict resolution, if it cannot be addressed locally by management

Seek advice and support from the Ethics Office (workplace ethical behaviour) and/or Peer Network Advisor if in place
## Causes

- Insufficient resources are allocated to support UNHCR’s operation with continuously decreasing budget and reduction in personnel coinciding with increasing caseloads and work demands
- Staffing needs in specific functions are not adequately resourced given the volume of work envisaged in the strategic plan
- Personnel lack the capacity, skills or guidance materials needed to perform new tasks required of them by changed processes arising from in-country changes or new HQ led initiatives or policies
- High-level of employment insecurity and lack of good people management lead personnel to exert themselves
- Insufficient time set aside for people management, building trust and ensuring inclusion and collaboration
- Lack of proper on-boarding
- Lack of proactive planning when individual circumstances warrant supervisory accommodation

## Proactive treatments

- Institutionalize and clearly define the scope and roles and responsibilities of Local Staff Association, Regional Staff Association and HQ Staff Council
- Provide support to personnel impacted with post reduction with career counselling, training, reach out to other agencies
- Implement AI on Managing Affiliate Workforce for effective management of and support to the affiliate workforce
- Strategically plan R&R cycles, annual leave, etc.
- Ensure knowledge management i.e., shared documentation, handover notes, archiving, briefing kit, etc.
- Where relevant, obtain medical clearance for applicable work modality of individual personnel

## Consequences

## Reactive treatments

- Institutionalize and clearly define the scope and roles and responsibilities of Local Staff Association, Regional Staff Association and HQ Staff Council
- Provide support to personnel impacted with post reduction with career counselling, training, reach out to other agencies
- Implement AI on Managing Affiliate Workforce for effective management of and support to the affiliate workforce
- Strategically plan R&R cycles, annual leave, etc.
- Ensure knowledge management i.e., shared documentation, handover notes, archiving, briefing kit, etc.
- Where relevant, obtain medical clearance for applicable work modality of individual personnel
Opportunity | Opportunity to increase personnel satisfaction through flexible and new ways of working without compromising effectiveness and efficiency
